-                                                         <

The diagram illustrates the relationship between GitHub Projects, a backlog, and a list of items. It consists of three horizontal bars of different lengths and three labels. The top bar is the shortest and is labeled "GitHub Projects" on its right side. The middle bar is of medium length and is labeled "backlog" below it. The bottom bar is the longest and is labeled "backlog" below it. The labels "GitHub Projects" and "backlog" are positioned to the right of their respective bars, while the label "backlog" is positioned below the middle bar.
